

JUN - 4 2013

June 3, 2013

Dear Dr. Maruszczak,

A little birdy told us in a "tweet" that you were an amazing science teacher. Coincidentally, our class, Mrs. Webster's third grade, LOVES science. We would be thrilled if you came to our classroom to open your entire science mind to us.

One reason we'd love for you to come in is that science is important. Science helps us prepare for our future. If we didn't have science we wouldn't know what the weather would be like or if the sun was a star or not. Also, Science helps us learn about the weather. Even though we already know a lot about this topic we would love to learn more about it like how fast the wind speed of a tornado is? What is the biggest thunder storm in the world? Or how deep was the deepest flood in the world? The last and final reason we think science is important is science prevents us from getting poisoned. If we didn't know that poisonous lead was in certain rocks and minerals we could've died because we touched the lead spread around our body. For these reasons, and many more, you **NEED** to come and teach more science to our class so that we can have a better future.

We hope that you will find some time in your busy schedule to join our class and share your wealth of science knowledge with us!

Sincerely,

Emily, Emma, Lucy, Rosie

Emily Kirby, Emma Ballard, Lucy Wiklund and Rosie Todd

and students in Mrs. Webster's
Class
